Work Done Today

Mindweave Academy Website

- Worked on the development and enhancement of the Mindweave Academy website.
- Improved website structure and content presentation for a better user experience.

New Section Development

- Created new website sections based on project requirements.
- Developed reusable components that can be implemented across multiple course pages.

Course Page Updates

- Added newly developed sections to all course pages.
- Updated course-related content, headings, descriptions, and other required information to maintain consistency throughout the website.

Responsive Design

- Started working on responsive design improvements for mobile and tablet devices.
- Ongoing optimization to ensure a seamless user experience across different screen sizes.

GitHub & Deployment

- Uploaded the latest code changes to GitHub.
- Successfully updated and deployed the latest version on the Vercel application.
- Verified successful build completion and deployment status.

Additional Tasks

- Fixed minor UI and layout issues identified during development.
- Performed testing of updated pages to ensure proper functionality.
- Maintained consistency and quality across all course pages.

Status
